Product Discontinuation Announcement worldwide – NetModule/Hirschmann NB2800 and NB2810 Product Families

Dear Valued Customer,

This letter serves as your formal notification that Belden is discontinuing the **NetModule/Hirschmann NB2000** product family, effective **Nov 1st, 2026**.

In order to meet the latest market and technology trends, Belden is constantly developing innovative and high-quality products and variants that complement and optimize our existing portfolio. As part of this portfolio evolution, Belden is currently developing a future router platform for bus applications, based on RNX technology. Subject to final development and release plans, the platform is expected to become available during 2027 and is intended to provide a migration path for customers currently using the NB2800 and NB2810 series.
Every product has a defined life cycle, and our products are typically characterized by a very long availability on the market. However, product discontinuation becomes inevitable over a period. For example, components in these products may be difficult to obtain or may no longer be available on the market. Due to evolving cybersecurity requirements and complying with the EU Cyber Resilience Act (CRA), significant software and security enhancements are required across multiple product families. For the products listed in this announcement, component obsolescence prevents implementing these enhancements in a sustainable manner. Therefore, Belden will discontinue these products according to the milestones below.

The standard warranty terms apply to all products delivered up to the last shipment date. For more information on Belden's Long Term Product Support Policy for Industrial Networking products, please visit Long Term Product Support (LTPS). Active special contracts in place prior to the announcement date will be honored according to the terms of that contract, with regards to product availability, warranty, or support terms.

Discontinuation Milestones worldwide – NetModule/Hirschmann

NB2800, NB2810 product family
(all subvariants including their OEM variants)
