Video compensation

The AdderLink AV units apply a high level of signal compensation that allows for a greatly increased range of very smooth and fine adjustments.

Brightness control

The AdderLink AV offers its own brightness correction to ensure that the image is crisp, clear and bright, regardless of the distance.

Audio

Digital audio transmission delivers high fidelity; click-less audio for speakers and microphones.

Integrated DeSkew

The AdderLink AV101R has integrated skew correction with a 300MHz bandwidth, meaning that it is more than powerful enough to counteract the negative effects of the skew.
