- Broadcast pre-defined SMS based on receipt of matching SMS and/or phone number
- Setup user accounts with different rights
- Integrated quad-band GSM modem
- Web-based configuration and management
- Flash memory to update firmware with the latest enhancements
- Desktop or panel mounting
- Two-year warranty

Highlights

Applications. The SMSFinder turnkey SMS server allows small to medium-sized companies the ability to reach their clients, subscribers, members and prospects via wireless SMS. It is ideal for:

- Mobile marketing campaigns
- Weather delays and closings
- Message confirmation
- Updates to clients
- Sending enterprise information to mobile employees
- Reminder and alert system updates
- Customer helpdesk information
- Perform statistics and surveys
- Link actions to send or receive event

Ready-to-Use SMS Server. The SMSFinder is a turnkey broadcast SMS server solution that includes an integrated server, database and quad-band GSM modem in one small compact device. Setting it up is a simple process of connecting to the network, inserting a properly configured SIM card and configuring from a network-connected PC using a Web interface. Now anyone on the network can broadcast messages.

Easy Set-up and Management. Recipient names and phone numbers can be entered using a network connected PC or incoming call. The address book can contain up to 20,000 entries with support for sorting, searching and group set-ups. Individual user accounts can have selected access rights and messages can be scheduled using predefined groups and pre-configured SMS messages.

Remotely Trigger Broadcasts. Users can also broadcast pre-configured SMS messages to defined groups by sending the server an SMS message from their cell phone. The server matches the SMS text or the phone number to trigger the broadcast.

Comprehensive Service and Support. The Multi-Tech commitment to service means we provide a two-year product warranty and service that includes free telephone technical support, 24-hour web site and ftp support.
