Wall Mounting

<sup>\*</sup>For 10th Gen Intel CPUs configured to run at 65W, operating temperatures will be limited to 70°C.

\*\* 65W CPUS may experience thermal throttling depending on extreme application workloads; this is also due to an increase in the physical CPU cores from the Intel silicon (up to 10 cores). Please note, this does not indicate system malfunction or problems in the fanless design. Please consult our embedded engineers for the best configuration to match your application requirements.
