

Product Change Notification—PCN# PCN001081

December 1, 2024

Dear Valued Customer,

We would like to inform you that Moxa is going to make changes to the MDS-G4000 Series. These changes will be implemented by running change from February 01, 2025. Please review the details below to determine how these changes will affect your products.

What will change?

1. System-to-MGMT module* connector change
Because the system-to-MGMT module connector is being phased out, we will replace it to ensure continued functionality and longevity of our products in the MDS-G4000 Series. This design change does not affect the form, fit, or functionalities and certifications of the MDS-G4000 Series.
*MGMT module is pre-installed by MOXA before shipment.
2. FPGA code update. This change does not affect the form, fit, or functionalities and certifications of the MDS-G4000 Series.
3. We will remove the RJ45-to-RS-232 9-pin female console cable from the package to achieve environmental protection without waste. Find Accessories (sold separately) information in the datasheet for your selection.
