DTC Enterprises Improves Tracking Solutions with AirPrime Modules

DTC Enterprises Improves Tracking Solutions with AirPrime Modules

Business Challenge

In order to meet the demand of a growing market in Thailand, D.T.C. designs and manufactures real time solutions for transportation. Thanks to GPS tracking, fleet management systems allow a greater control of operations, lower management costs and an increased level of security for the benefits of fleet managers worldwide.

Sierra Wireless Solution

Designed and developed at D.T.C.’s Research Laboratory, the SW-E Series Fleet Management and Monitoring solution is built around the Sierra Wireless AirPrime Q2687 Intelligent Embedded Module. In order to develop customer requirements, D.T.C.’s tracking system uses the Open AT Operating System.
